## **Plastatech® Engineering, Ltd. Manager Selected as Vice President of International Geomembrane Consortium**

**SAGINAW, MICHIGAN** — Laura Storey, Business Development Manager for Saginaw-based Plastatech Engineering, has been elected to serve a two-year term as Vice President of the international industry and academic consortium Fabricated Geomembrane Institute (FGI). Laura's seat and other elected positions were selected at the FGI annual membership meeting in Orlando, Florida on March 13<sup>th</sup>.

"I'm looking forward to continuing my work with such a passionate group of individuals," said Laura. "It's amazing what great things can be accomplished when leaders pull together to help educate the industry on the benefits of utilizing fabricated geomembranes."

FGI is a nonprofit organization located at the University of Illinois at Urbana-Champaign comprised of 54 industry and academic organizations. They are dedicated to advancing the use of fabricated geomembranes through education, research, and technology transfer.

### **About Plastatech® Engineering, Ltd.**

Plastatech produces calendered and extruded PVC films, weft-inserted textiles, single-ply PVC roofing membrane, reinforced and non-reinforced geomembranes, and laminated vinyl fabrics that are used for tension structures, temporary shelters, agricultural storage, pond liners, and other applications. Plastatech is headquartered in Saginaw, Michigan. For more information on Plastatech, call 800-892- 9358 or visit [www.plastatech.com](http://www.plastatech.com).
