**Plastatech® Engineering, Ltd. Unveils New Reinforced Geomembrane, Tech 7®**

**SAGINAW, MICHIGAN** – November, 2020 – Plastatech Engineering is pleased to announce the launch of their new reinforced geomembrane, Tech 7. This geomembrane is our toughest membrane yet and is designed to remain strong in the harshest environments while also helping to contain a variety of chemicals and pollutants. Tech 7 is available in black and is our thickest membrane at 40 mils. Reinforced with a high-tenacity, anti-wicking, polyester scrim that provides exceptional dimensional stability, puncture strength and durability, Tech 7 delivers a cohesive bond between the high-thread-count scrim and film, creating a non-separable, long-lasting adhesion.

“This new reinforced geomembrane compliments Plastatech’s long standing commitment to providing products that our customers are looking for to enhance their business opportunities,” Mark Rose, Plastatech Sales Manager explains. “We’re excited to offer a product that allows our customers the ability to meet the installation and performance demands of the most challenging applications, and to be a single-source solution to all of their geomembrane needs.”

Plastatech’s Tech 7 geomembrane is manufactured in our quality-controlled factory conditions and has been tested under various ASTM industry standards for breaking strength, tear strength, adhesion, puncture resistance, abrasion resistance, and flexibility. For detailed information on the complete line of Plastatech’s new reinforced geomembrane, or to request a sample or quote for your future project, visit [www.plastatech.com](http://www.plastatech.com) or call 800-892-9358.

**About Plastatech® Engineering, Ltd.**

Plastatech produces calendared and extruded PVC films, weft-inserted textiles, single-ply PVC roofing membrane, reinforced and non-reinforced geomembranes, and laminated vinyl fabrics that are used for tension structures, temporary shelters, agricultural storage, pond liners, and other applications. Plastatech is headquartered in Saginaw, Michigan. For more information on Plastatech, call 800-892-9358 or visit [www.plastatech.com](http://www.plastatech.com).
